

CBIO AWARDS

Computational Biologists Awards

CALL FOR PROFILE–COMPUTATIONAL BIOLOGISTS AWARDS

About Awards: Computational Biologists takes the privilege to awarding the Industries, Academicians, Researchers, Doctors, Scientist, and Regulators from Science, Health and Engineering fields across the globe to its International Events. The International Research Awards is an annual gathering. This Event is a unique international platform that's a meeting for researchers. We look forward to personally welcoming all the award winners.

Objectives: The Computational Biologists International Events is awarding high quality Researchers in different subfields. The purpose of award ceremonies and assemblies is to celebrate researcher achievement and motivate them to continue on their path. Good researchers are more motivated to succeed in their research field. People want to be respected and valued by others for their contribution. Offer the opportunity to be updated on the latest research outputs on several topics. Organize specific workshops around the most attractive and current issues. Gather worldwide experts as Event speakers.

Key Features and Excellent: Venue | Inspiring Speakers | Certificate | Medal | Memento | Stage Photograph | Awardees listed on website

Award Categories: Young Scientist Award | Best Researcher Award | Outstanding Scientist Award | Lifetime achievement Award | Women Researcher Award | Best Innovation Award | Best Faculty Award | Best Scholar Award. Institute Organization Awards: Excellence in Innovation | Excellence in Research | Excellence Award (Any Scientific field) | Best Research Innovation Extension activity.

Topics of Award Subjects include, but are not limited to: Bioinformatics | Systems Biology | Computational Genomics | Structural Bioinformatics | Evolutionary Bioinformatics | Computational Neuroscience | Omics Data Analysis | Machine Learning in Biology | AI in Drug Discovery | Computational Proteomics | Population Genetics Modeling | Network Biology | Metagenomics | Molecular Dynamics Simulations | Quantitative Biology | Biological Data Science | RNA-Seq Data Analysis | Single-Cell Computational Analysis | Computational Phylogenetics | Synthetic Biology Modeling | Functional Genomics | Genome-Wide Association Studies (GWAS) | Computational Epigenetics | Algorithm Development for Bioinformatics | Protein Structure Prediction | Biological Image Analysis | High-Throughput Sequencing Analysis | Computational Immunology | Microbiome Data Analysis | Translational Bioinformatics | Pharmacogenomics Modeling | Cancer Genomics Computational Studies | Computational Systems Medicine | Computational Virology | Digital Health and Computational Biology | Structural Systems Biology | Deep Learning for Genomics | Computational Synthetic Biology | Epigenomic Data Integration | AI in Personalized Medicine.
